

SECURE VENDING SOLUTIONS

SMART, SECURE
INVENTORY SOLUTIONS

SECURE VENDING SOLUTIONS

SMART, SECURE INVENTORY SOLUTIONS

Offering, easy-to-use industrial vending machines and VMI technology providing customers with 24-hour availability, enhanced real-time usage reporting, full traceability and secure access to product.

Combining our knowledge & experience from an array of equipment manufacturers, we offer full service support, ensuring the right product solution is offered every time.

**Bringing you the
latest innovations
from the leading
industrial vending
machine supplier.**

MAKING STOCK AVAILABLE 24/7

VMI controls the stock held on a customer's site and manages the full reordering and issuing of stock to the end users through a combination of hardware and software solutions.

SOFTWARE

The software is powerful and configurable to meet the broad requirement of a wide range of industries and application. The software comes complete with all the features which can be turned on or off depending on your requirements.

- Ease of use
- Full user accountability
- Added compliance
- Consumption control
- Rations / Restrictions available
- Traceability of usage (jobs)
- Real-time reporting

Reduce Expenses

Free up valuable employee time by driving efficiencies with your ordering, invoicing and general supply chain management

Increase Productivity

Reduced out of stocks and inventory chasing

Manage Inventory

Complete control and visibility of your stock management and consumption

Save Time

More time spent on the task in hand rather than running around looking for stock

Providing Data

Invaluable insight into supplier and manufacturing product requirements

Rolling Contract

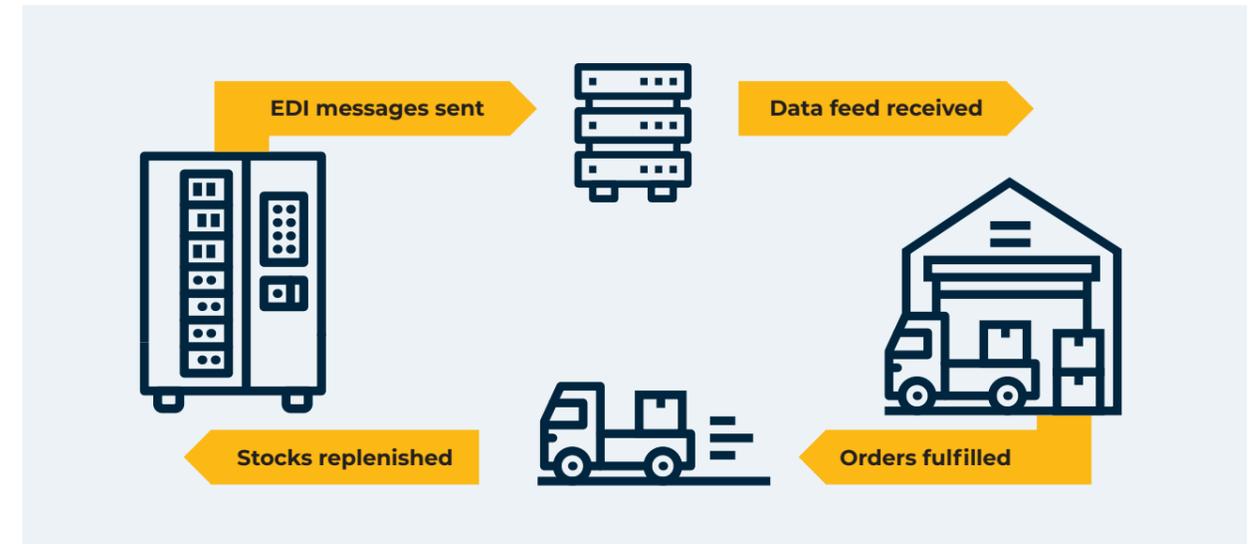

No tie in, one simple agreement to take advantage of this offer

HARDWARE

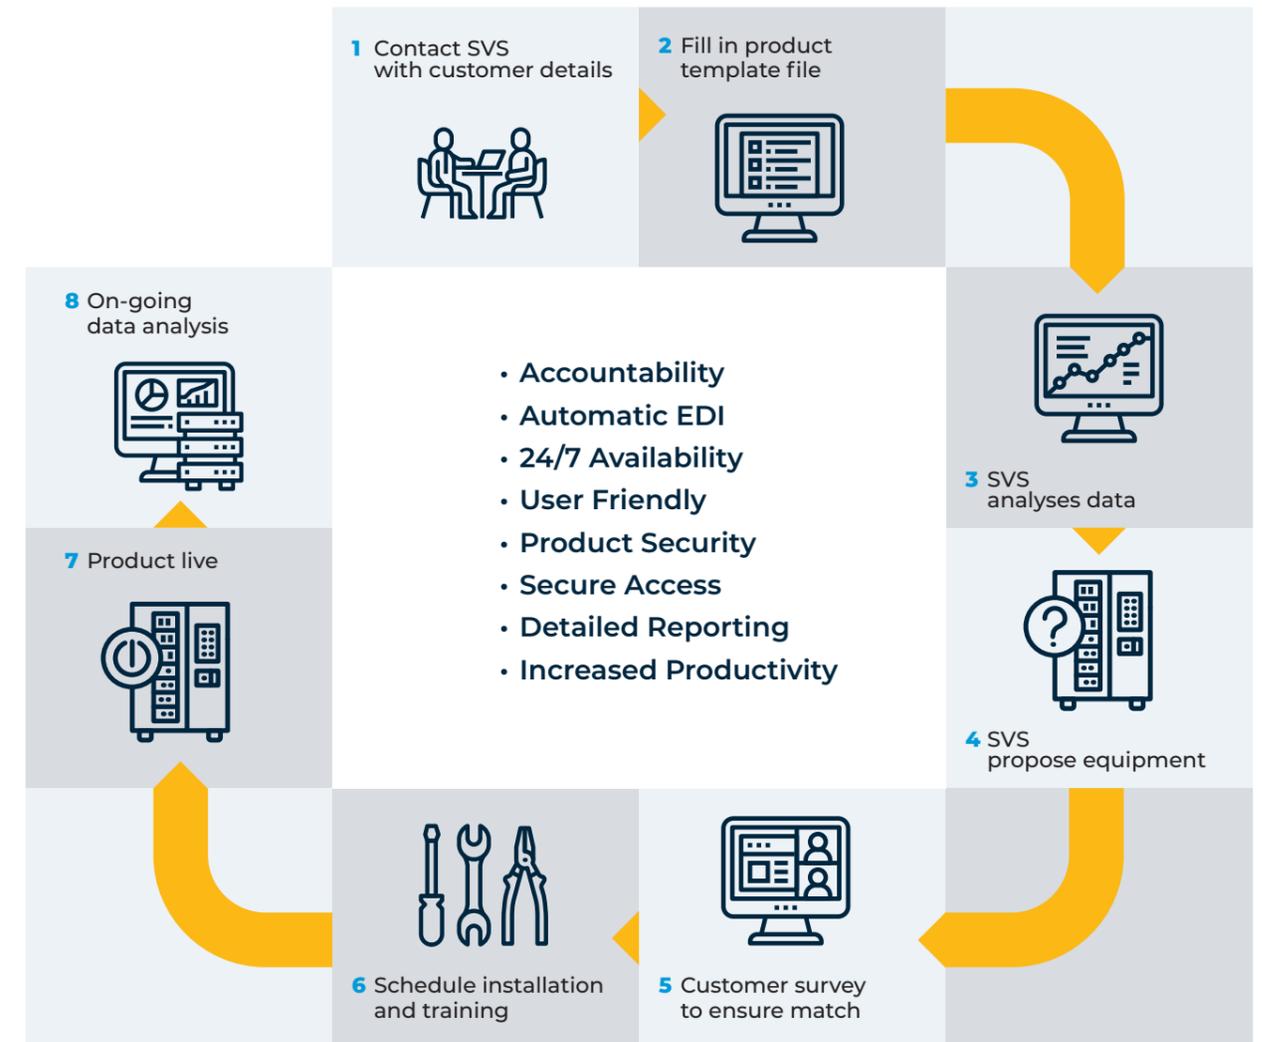

Our vending machines are extremely robust, modular in design, space efficient and configured to your bill of materials. Each vending system has user friendly software, 24/7 stock availability and accurate stock control.

There are three types of secure access options: biometric, swipe card or RFID. All our vending machines can be integrated into customer networks allowing for multiple locations and sites to be managed through a single database.

These systems give substantial operational cost savings by increasing productivity and reducing downtime giving a real benefit on investment.

SELF PERPETUATING

TESTIMONIALS

“We are delighted to have been presented with a supplier recognition award from Johnson Controls (Tyco). The award is in the category of ‘Innovation’ in recognition of the control and consumption reduction benefits that the Secure vending solution has delivered as part of our overall service offering. Subsequently, this has led to UTS securing additional business from other Johnson Controls group companies. This would not have been possible without the considerable support from svS. Please pass on our sincere thanks to your extended teams for their help with this achievement.

David Jackson

Managing Director United Tooling Solutions

“I can highly recommend svS to any distributor considering a vending machine installation. They are excellent to work with, very competitively priced and every aspect of the install was dealt with in a polite, professional and timely manner. I am happy to confirm that we will definitely be using svS again on our next installation.

Trevor Davenport

Nuffield Engineering Services

“Vending was always an area that we struggled to break into. However, the difference now is undeniable. With the help and guidance from the team, we have been able to secure a new major account with the installation of five vending machines so far, with the strong possibility of more being installed in the near future. The machines were designed to suit our customers specific requirements. This procedure was dealt with, extremely professionally and efficiently. In gaining this initial vending business, we now have the confidence to move forward and already have potential, further vending business in the pipeline. Many thanks to the team for their help and assistance with this, it is very much appreciated.

Ashley Gibbs

OCL Kingswinford

DO YOU NEED US?

“Staff spend too much time in stores.”

“Typing restock orders is time consuming.”

“This item should only be used by supervisors.”

“Why is my spend so high?”

“I don’t know what I have spent.”

“I have consigned stock.”

“Why are so many being used?”

“Staff only need to have 1 item per day.”

“What was my spend on this project?”

“I don’t know if we have that in stock.”

“Can I track all my items?”

“Supply store is 20 minutes away.”

THE BENEFITS

HOW DOES IT WORK?

ESTABLISH NEED OR OPPORTUNITY

Do you have a VMI requirement?
Are you struggling with stock controls?

PRESENTATION

SVS will happily conduct a full presentation to outline your needs and requirements.

SITE SURVEY / PRODUCT IDENTIFICATION

Seeing the product and understanding the site will assist in making the best choice of vending solution to offer.

BUILD AND CONFIGURATION

SVS will bespoke build your new vending machine to your customers' requirements.

GO LIVE / TRAINING

Following a project plan SVS ensures a seamless installation with full training on the systems.

DATA ANALYSIS

SVS can assist in GAP / Share of Wallet analysis using data from the vending machines.

ONGOING SUPPORT

Our support offering covers hardware and software assistance to ensure your machines longevity.

OMNI CHANNEL APPROACH

We provide a fully integrated multi-channel sales process enabling a customer centric approach to communication, insight, analysis, stock ordering, control and order management and fulfilment.

WHY ?

OUR COMMITMENT TO YOU

We take care of the whole process for you, from contract negotiation through to installation, measurement and maintenance, providing end users with peace of mind that all the benefits, product offerings and services are to the highest industry standard.

PEOPLE

The SVS team has over 70 years of collective experience in vending projects across a multitude of industry sectors.

PROJECT MANAGEMENT

From the initial visit and consultation to the design and installation of a system tailored to your individual business, SVS will take control of your vending project to ensure it's the 'best fit'.

INSTALLATIONS

SVS has its own team of experienced engineers that will guarantee a timely, professional and trouble free installation.

MAINTENANCE AND REPAIR

SVS can offer hardware and software support with a package that fits the customer requirements.

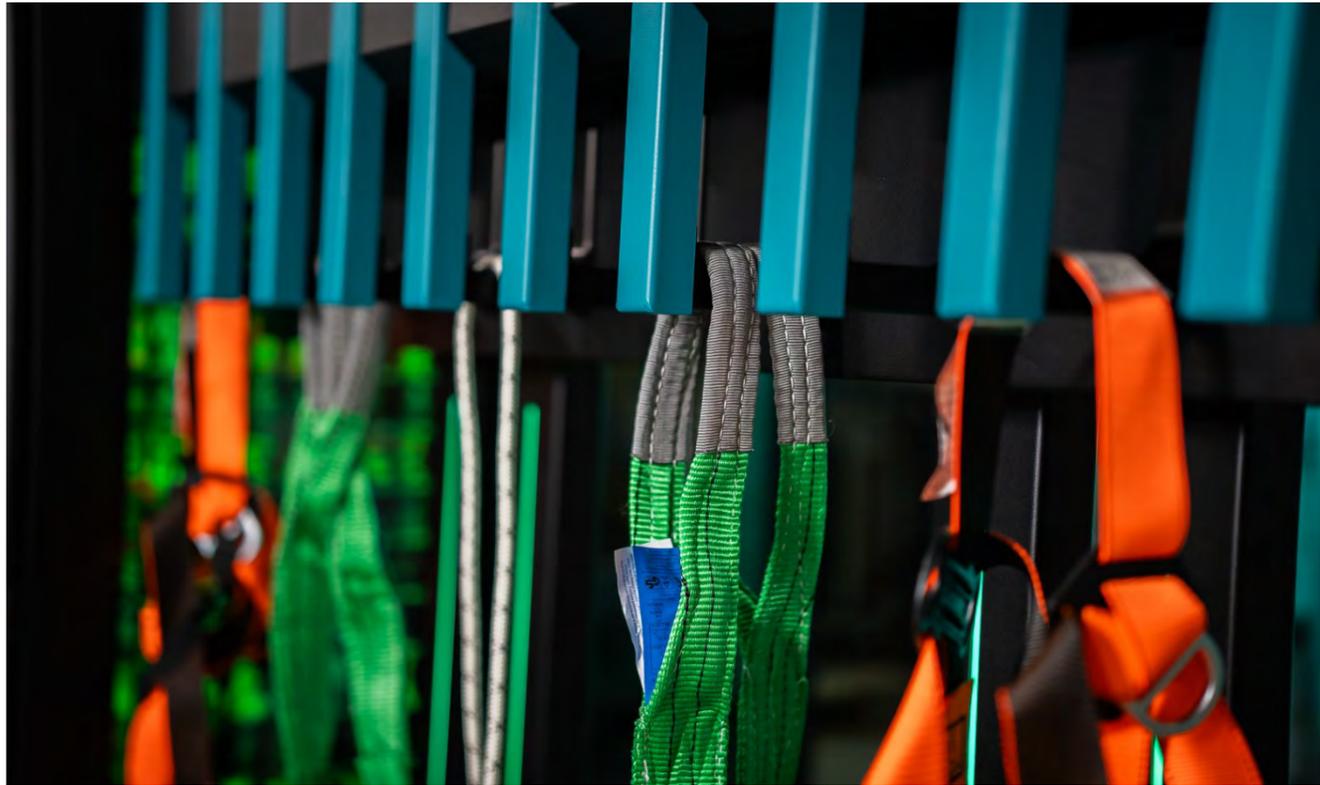

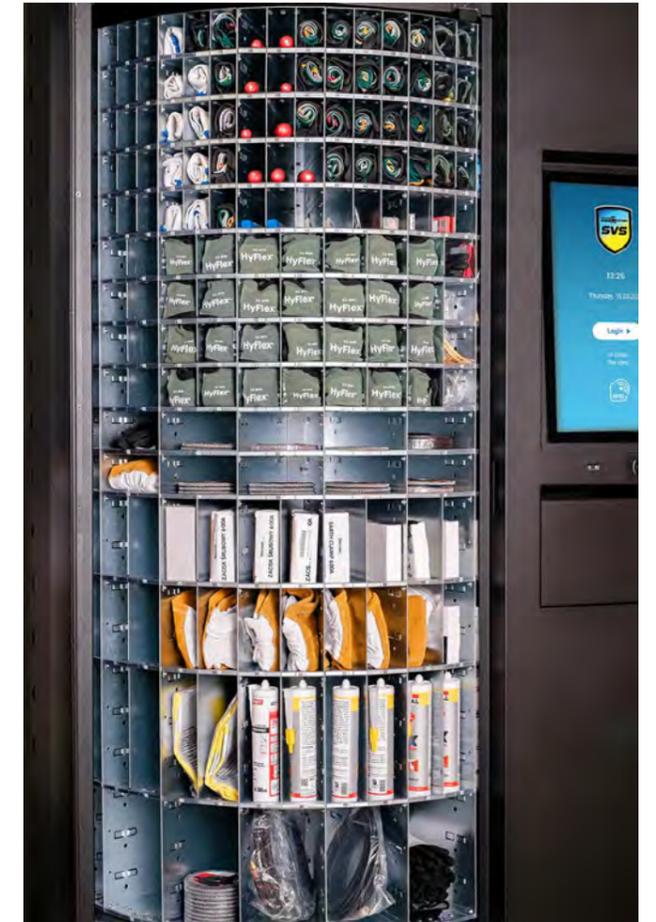

TRAINING

Training is carried out immediately after installation. Training can be tailored to customer requirements from general use to administration level.

STOCK IN TRADE

SECURE DEPO MAX

SecureDepo Max is a modern and self-service automatic machine enabling the registration of returned products for disposal or reuse (washing of dirty clothes). The drop-off takes place in an intuitive manner by inserting the products into an automatically opening loading chamber, which then fall into a mobile basket. A vision system and optical sensors enable full recording of returned products. The vending machine is a SLAVE device that works with all SecureDepo Max solutions in the MASTER version.

height mm	2,000
width mm	890
depth mm	1000
voltage V	230 VAC - 50 Hz
power usage - W	5/80
max. drum load - kg	300
weight - kg	135

SECURE DRAWER

SecureDrawer is a modern, self-service vending machine for product distribution. The design, based on a drawer system, offers the possibility of storage of up to 1,792 unique items of different sizes. Ease of operation is provided by 21" touch screen with modern and intuitive interface. Two product loading options enable even faster and simpler filling the machine. The SecureDrawer has a built-in RFID reader, barcode and QR code scanner which supports the product return function.

temp. °C	from 5 to 70

SECURE SPACE

ROOM FOR MORE

- Mobile product management regardless of location
- Adaptation of the containerspace tailored to individual needs
- Access to the self-service warehouse 24/7
- 3 sizes of publishing space 10' (3m), 20' (6m), 40' (12m) in length
- An alternative to a classic tool room or a health and safety warehouse, bringing measurable savings

MOBILITY

Changing the location of the publishing space depending on the needs and work progress. E.g. on specific job sites, such as road or pipeline construction.

FULL CONTROL

IRSystem monitors the level of product availability in real time and enables the limitation of spending for individual users and groups.

SCALABILITY

The publishing space is individually arranged and in the future, modified or combined with another IRSpace.

24/7 AVAILABILITY

Remote management allows unlimited access for 2 or 3 shifts.

10' (3m)

20' (6m)

40' (12m)

IR HOOK

The IRHOOK is an innovative vending machine dedicated to ensuring employee safety and equipment reliability by overseeing inspection dates mandated by relevant authorities. The device issues reminders for upcoming mandatory inspections and restricts access to products if inspection deadlines have expired. Designed for tracking equipment such as height safety gear, slings, and ladders, it addresses key market needs. Available in versions with 6 or 10 hooks,

Height	430mm 16.9"
Width	1500mm 59.1"
Depth	230mm 9.1"
Weight (Unladen)	90/140kg

IR DEPO 3

The IRDEPOT3 machine features three independent compartments, which can be configured on request for different product categories. From workwear intended for laundering, through high-performance tungsten carbide tools for recovery, to other regenerable assets, IRDEPO 3 is designed to handle them all. Equipped with optical sensors and a vision system, the unit facilitates verification of proper usage by employees.

Height	1435mm 56.5"
Width	1040mm 40.9"
Depth	500mm 19.7"
Weight (Unladen)	210kg

DRAWER PRO

IRDRAWER PRO is a state-of-the-art, self-service automatic dispensing machine for product distribution. Its design, featuring a system of drawers, allows storage for up to 1,440 unique items of various sizes. Ease of use is ensured through a 21-inch touchscreen with a flexible and intuitive interface. Two product loading options make refilling the machine faster and more convenient. IRDRAWER PRO is equipped with a built-in RFID reader, barcode scanner, and QR code scanner to facilitate product returns.

Height	1800mm 70.9"
Width	700mm 27.5"
Depth	520mm 20.5"
Weight (Unladen)	250kg
Maximum Capacity	1440 Max Storage Locations

28 LEVEL

28 Level is an incredibly versatile vending machine suitable for almost any industry or application. This is both quick and easy to set-up and operate, providing built-in reports and audit-trail making it simple to trace and account for your stock.

Height	2010mm 79.1"
Width	545mm 21.5"
Depth	510mm 20.1"
Weight (Unladen)	150kg
Maximum Capacity	1248

ROTOFLEX

With all-new electronics and the promise of unparalleled flexibility in a carousel unit, RotoFlex offers the widest array of storage spaces in the smallest footprint. With horizontal and vertical configurability, RotoFlex can meet a variety of needs simply.

Height	1852mm 72.9"
Width	728mm 28.7"
Depth	708mm 27.9"
Maximum Capacity	507

MINI MODULO

Mini Modulo incorporates industry leading and award winning technology by SupplyPoint Systems to provide a higher capacity machine at a very competitive cost.

Height	332mm 13.1"
Width	705mm 27.8"
Depth	500mm 19.7"
Weight (Unladen)	40kg
Maximum Capacity	432

LOCKER FLEX

LockerFlex is designed to allow for the combination of several small compartments into a larger one - suiting variable product heights and sizes. The horizontal shelves can quickly be removed and put back in without the use of any tools, allowing for a very easy (re)configuration. LockerFlex can be adapted precisely to your needs and item portfolio at any point in time!

Height	2030mm 66"
Width	1093mm 42.9"
Depth	500mm 20.1"
Weight (Unladen)	254kg
Maximum Capacity	27

STORE TEL

StoreTel makes managing tool cribs and storerooms easier than ever. Perfect for staffed cribs/stores or self-serve environments, StoreTel provides real-time visibility and tracking for thousands of items ensuring your organisation has just the right amount of what's needed, when it's needed.

Height	1000 39.4"
Width	800 31.5"
Depth	750 29.5"
Weight (Unladen)	Per Drawer
Maximum Capacity	90kg Per Drawer

ROTOPOINT

RotoPoint is a robust machine that offers an affordable and flexible solution for safely managing a variety of high and low use items, particularly PPE or MRO consumables. This is available either individually or integrated as an addition to further SupplyPoint machines. There is a choice of 6 regular configurations and can be extended by up to 10 frames, controlling between 468 and 4680 secure compartments.

Height	2010mm 79.1"
Width	1030mm 40.6"
Depth	1030mm 40.6"
Weight (Unladen)	470kg
Maximum Capacity	468

MODULO GEN 2

ModuloGen2 combines the finest engineering with award-winning technology to offer an exceptionally economical machine with greater capacity. This reliable machine is touchscreen operated and features ergonomically designed compartments making it incredibly user-friendly.

Height	2010mm 79.1"
Width	545mm 30.2"
Depth	525mm 20.7"
Weight (Unladen)	185kg
Maximum Capacity	2160

VIEWPOINT

ViewPoint kiosk, powered by VendTel, provides a window into inventory across your facility for those who need it, where they need it. Perfect for large facilities and/or environments with staffed cribs/stores. ViewPoint kiosk provides real-time visibility of items ensuring your team members can locate and reserve items at any Secure Vend point-of-use in your facility.

SECURE SCAN

WHAT IS SECURE SCAN?

*Android OS Only

Secure Scan is a mobile phone app* that is designed to help you quickly scan your consignment cupboards at your customer site and send the restocking information to your internal person for quicker processing, removing the need to wait for your driver to return with the paper sheets.

HOW DOES IT WORK?

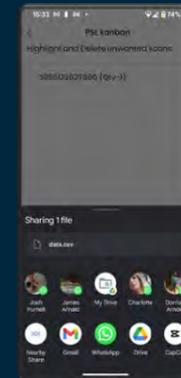

01 Select your customer from a preloaded list.

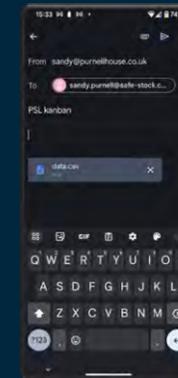

02 Scan the barcode or QR code on your bin.

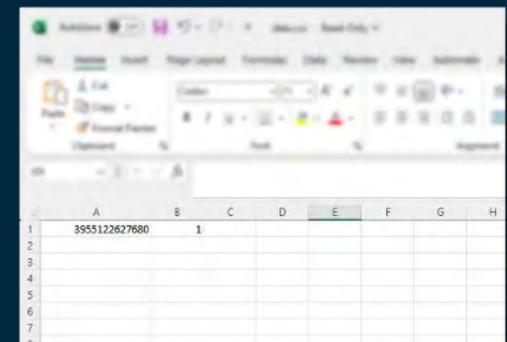

03 Enter the quantity you want to order and press 'Continue' to move on to your next product or press 'Proceed to Send' to email the list.

04 Select your email.

05 The app will attach your file along with prepopulating the 'To' address and the Subject Line as the customer's name. Simply press send!

Your internal person will receive a file with your product code and quantities required for inputting into your ERP System. (If Merlin you can copy and paste).

Price on request.

For the app only, you supply the mobile device and data contract.

Secure Scales Range

Secure Scales is Secure Vending Solutions' connected inventory management system, designed to control the supply of high-usage consumables and critical components across production areas and warehouses. Combining smart weighing technology with a cloud-based platform, it provides real-time visibility of stock levels, usage, and replenishment needs at the point of use. By reducing shrinkage, preventing stockouts, and streamlining replenishment, the Secure Scales range helps teams maintain availability, improve accountability, and keep operations running efficiently.

Secure Cupboard

Secure Cupboard is Secure Vending Solutions' closed-door, controlled-access version of Secure Scales. Users log in via RFID to unlock the cupboard and access the weighed stock inside, with every withdrawal automatically recorded against the user for clear accountability. With real-time stock visibility and user-level tracking, Secure Cupboard reduces loss, improves traceability, and makes replenishment simpler and more accurate.

Secure Rack

Smart weighing and stock-control platform for vending and unattended retail. Connected scales track product levels in real time, so you can see what's in each bin, spot low stock early, and reduce wasted site visits. With simple setup tools and a live dashboard, Secure Scales helps teams replenish faster, improve availability, and keep accurate inventory across machines and locations. Up to 48 locations per rack.

Secure Scales

Warehouse-ready version of Secure Scales, built for existing racking. Using standalone, mountable scales that fit directly onto current shelves and bays, it brings real-time stock visibility to stored parts and consumables without changing your layout. Teams can instantly see what's in each location, get low-stock alerts, and replenish faster—cutting downtime, reducing manual checks, and improving inventory accuracy across the warehouse.
